

Internet Resources for Royalty Owners

Oklahoma NARO Convention

May 8th, 2013

GOAL:

Show and demonstrate Internet Resources:
(Websites, Web-Apps, Phone/Tablet Apps and Newsletters)
to assist Royalty Owners research, post questions and stay
informed.

Website URL	Description
Blogs	
www.naro-us.org/forum	NARO General Message Board. Boards are divided by state and county or subject matter. Contain information regarding leasing activities, division orders, geophysical permit and many other topics important to mineral and royalty owners.
www.allexperts.com/el/Oil-Gas/	Allexperts is an excellent source for specific questions to be posted and answered. For leasing, title, partition and pooling. Make sure you have details of your question prepared for these experts to answer your questions.
www.Linkedin.com/	There many groups and companies on this Business networking site. It like Facebook of the business world. Groups to look for include. NARO, OIPA, IPAA, Mineral Rights & Royalty Owners.
County Records	
www.okcountyrecords.com/	Oklahoma Public Land Records for all but 15 counties, some of which have their own online search; such as Oklahoma County. Records for county clerk and civil, title and lien search, plat maps and deed records. FREE to Search and return Indexes on your search criteria. Download or print copies are about \$1.00 per page. Setting up an account does not require you to make a purchase. Preview/Print Tokens are \$1.00 each.
www.courthousedirect.com/	Links to courthouses records, Grantor/Grantee Indexes and document images of Real Property Records across the United States. County coverage is somewhat limited in Oklahoma and other states compared to other companies but a good place to start if you need to look up indexes or records. Free to search, requires login to download documents.
www.naco.org/	National Associate of Counties. A great resource if you need to find contact information for any county in the United States. Including email address of each office. Click About Counties > Find A County to get started.
Geology/Land	
www.geology.com	A great source of education on geology, from what are minerals, rouse fractures, LNG, Mineral Rights, shale plays and so much more.
www.ogs.ou.edu/level2-geology.php/	Oklahoma Geological Survey. Geology Rocks! Learn about shale plays in the state and many other energy related topics.
http://www.google.com/intl/en/earth/index.html www.earthpoint.us	Google Earth. Locate your mineral properties. Combined with Earthpoint.us you can search by Township and Range. Earthpoint allows searches on Google Earth using the United States Public Land Survey.

Website URL	Description
Unclaimed Property	
www.unclaimed.org/	Website “Representing State Governments that actively find owners while protecting forgotten funds until claimed”. Opens windows to each state to search for unclaimed funds.
http://OK.gov/unclaimed/index.php	Straight to the Oklahoma unclaimed property website. Have you check for unclaimed property recently?
www.occeweb.com/MOEASearch/index.aspx	MOEA – Mineral Owners Escrow Account. Check here for funds that have been put in suspense for an extended period of time.
Legislative	
www.OIPA.com	Oklahoma Independent Petroleum Association membership is mostly small and large oil and natural gas producers but also included service, supply drilling companies as well as Mineral Owners. Committed to promoting the interest and welfare of independent oil and gas operators, working interest owners, royalty owners and those businesses who provide services for the energy industry. Focused on legislative, regulation and industry affairs.
www.ipaa.org	The independent Petroleum Association of America. A membership based national trade association representing independent oil and natural gas producers. IPAA also works closely with independent national, state and regional associations such as NARO to ensure a strong, viable domestic oil and natural gas industry.
Subscription Only	
www.drillinginfo.com	This site is expensive but very comprehensive on drilling, permitting, production and leasing information in multiple states. You can also setup Virtual Scouts that email activity to you on a daily or as activity occurs basis.
www.oil-law.com	The least expensive paid subscription service, Well-Data for Oklahoma. Provided well information in an easy to review map based on Township and Range.
www.pangaeadata.com	Review well records, regulatory orders and applications with the OCC. Setup searches on areas or operators and have emailed on a daily basis.
APPS	
Baker-Hughes Rig count	Easily see where drilling activity is high, clicking on a rig will give additional detail.
SLB Glossary	Industry related terms and definitions, enter a search and related terms come up.
Arrow Engine Company Oil & Gas Prices	Prices are provided by a third party but it is a nice little app to check, Crude Oil, Natural Gas, Dow Jones and NASDAQ activity.
PennEnergy	Oil and Gas Industry news. US and Globally news.

Mineral Rights

Basic information about mineral, surface, oil and gas rights.

Fee Simple - Complete Ownership

In most countries of the world all mineral resources belong to the government. This includes all valuable rocks, minerals, oil or gas found on or within the Earth. Organizations or individuals in those countries can not legally extract and sell any mineral commodity without first obtaining an authorization from the government.

In the United States and a few other countries, ownership of mineral resources was originally granted to the individuals or organizations that owned the surface. These property owners had both "surface rights" and "mineral rights". This complete private ownership is known as a "fee simple estate".

Fee simple is the most basic type of ownership. The owner controls the surface, the subsurface and the air above a property. The owner also has the freedom to sell, lease, gift or bequest these rights individually or entirely to others.

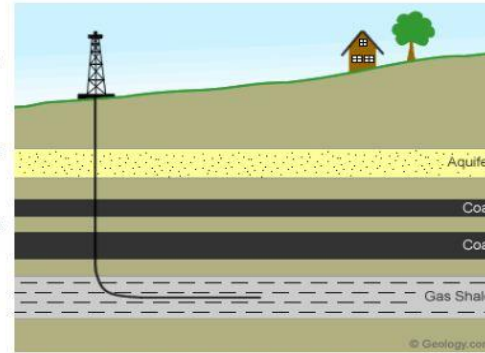

If we go back in time to the days before drilling and mining, real estate transactions were fee simple transfers. However, once commercial mineral production became possible, the ways in which people own property became much more complex. Today, the leases, sales, gifts and bequests of the past have produced a landscape where multiple people or companies have a partial ownership of or rights to many real estate parcels.

Most states have laws that govern the transfer of mineral rights from one owner to another. They also have laws that govern mining and drilling activity. These laws vary from one state to another. If you are considering a mineral rights transaction or have concerns about mineral extraction near your property it is essential to understand the laws of your state. If you do not understand these laws you should get advice from an attorney who can explain how they apply to your situation.

Surface Rights vs. Mineral Rights

"I'll pay you \$100,000 for the coal beneath your property!" This type of transaction has happened many times. The fee simple owner may not have the interest or the ability to produce the coal beneath his property but a coal company does.

In this type of transaction the owner wants to sell the coal but retain possession and control of the surface. The coal company wants to produce the coal but does not want to pay an additional price to acquire the buildings and the surface. So, an agreement is made to share the property. The original owner will retain the buildings and rights to the surface, and the coal company will acquire rights to the coal. The transaction can involve all mineral commodities (known or unknown) that exist beneath the property, or, the transaction can be limited to a specific mineral commodity (such as "all coal") or even a specific rock unit (such as the "Pittsburgh Coal").

"Mineral Rights" entitle a person or organization to explore and produce the rocks, minerals, oil and gas found at or below the surface of a tract of land. The owner of mineral rights can sell, lease, gift or bequest them to others individually or entirely. For example, it is possible to sell or lease rights to all mineral commodities beneath a property and retain rights to the surface. It is also possible to sell the rights to a specific rock unit (such as the Pittsburgh Coal Seam) or sell the rights to a specific mineral commodity (such as limestone).

GEOLOGICAL STUDIES

Throughout the years, the Survey has studied many types of geologic hazards in Oklahoma, including [earthquakes](#), abandoned mines, and sometimes localized events where gas or oil found a surface outlet in a pond or stream. The OGS has examined hazardous waste, water issues, industrial minerals, and many other topics important to Oklahoma. Below are some highlights of that work.

Township and Range - Public Land Survey System on Google Earth.

A user account is recommended for the features on this web page.

This page maps the United States Public Land Survey System onto Google Earth. For more information about the land survey, Wikipedia has a good [article](#). You can read about locating parcels at [Earth Point Blog](#).

There are two data sets to choose from, "BLM" and "National Atlas".

BLM Township, Range, and Section

Displays townships, sections, and quarter-quarter sections if you zoom in close enough (most, but not all areas have quarter-quarter sections mapped). Calculates area, centroid, and corner points. You must zoom into the central or western United States to see the data.

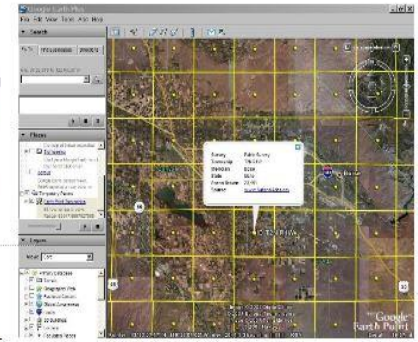

Help: [How to install township and range.](#)

A Welcome Message from State Treasurer Ken Miller:

Returning lost property to Oklahomans is one of the more satisfying public services I provide.

My job is to find the rightful owners, or heirs, of unclaimed funds, stocks and contents of safe deposit boxes. Oklahoma businesses bring unclaimed property to my office for safekeeping as required by law.

We might have money for you from dormant checking and savings accounts, unpaid wages and commissions, securities, cash dividends, uncashed money orders, utility deposits, refunds, and other types of property. Land and buildings are not included.

There is no charge for making a claim and there is no time limit on claiming your property!

Good luck. I hope we find your pot of gold!

You Could Find a "Pot of Gold" in the Unclaimed Property Fund!

[Frequently Asked Questions](#) - [Help](#) - [How do I claim funds?](#)

Unclaimed Property -

If you have royalty interest, from time to time funds can show up in the State's unclaimed property. Could be as simple as a typo in the address where check was sent. This is good to check once or twice a year. Additionally, unknown respondents from a pooling order could have their funds end up in MOEA.

About Us

The Independent Petroleum Association of America (IPAA) has represented independent oil and natural gas producers for three-quarters of a century. On June 10, 1929, President Herbert Hoover called a national and state conference to discuss and formulate a practical program for the conservation of America's natural petroleum resources.

Web Application Information

(PLEASE READ - Very Important) The following instructions do not apply to "New Well Browse".

- Follow these special instructions if your computer's operating system is **XP, Vista or Windows 7**.
- DSL, Cable or other High Speed Internet connection highly recommended.
- 32 bit Apple computers do not have to download or install the JInitiator or the windows fix. Just run it directly from Safari.
- Case Processing and the Oil and Gas Database do not run on Firefox 3.6. They will run on earlier versions.
- Please set your display to 1024 x 768 for best results.
- Please set your browser to allow pop-ups for this site or hold down the CTRL key then click on the button.
- You can link to scanned images after executing a search.
- If you have any questions, you may call our helpline at (405)521-3636 between the hours of 8:00 am to 4:30 pm Monday through Friday.
- You will be prompted to download JInitiator the first time you use our web applications. This is required to run the Case Processing and Oil and Gas Database. Left click the bar that appears and tell it to run the ActiveX control.
- Depending on your internet connection, this download will take from 3 to 45 minutes and 25 megabytes of hard disk space.

Case # or CD Cause assigned to a Spacing and/or Pooling Application and additional related documents.

This is a good place to locate all documents related to a Pooling and/or Spacing.

There are a number of documents that are not mailed to respondents that may be of interest.

Every wonder why a pooling hearing seems to take so long for the order to be issues?

One reason could be a Motion to Protest.

This Case# came from a property last year you can see that the first four digits are the year.

Clicking on the ID number will bring up a PDF file of the Spacing Order. To get back to this page click on the back button on your Mouse or keyboard.

FINDINGS

1. That this is the Application of W. C. Payne for an Order establishing proper drilling and spacing units for the Toronto, Tonkawa, Missourian, Layton, Gibson, Osborne, Atoka, Hunton, Viola Lime, Bromide by amending Order No. 73246, as amended by Orders No. 82548, 90376 and 90672, to include Sections 16 thru 21 and Sections 28 thru 34, T9N-R5W and Sections 6 and 7, T8N-R5W and Section 36, T9N-R6W, and by vacating Order No. 75672, last Order No. being 94421, as to the Lower Pennsylvanian Sands under said lands, and establish 640-acre units for the Hart for the same lands, all in Grady County, Oklahoma; that the evidence shows that the Hart is the same common source of supply as that covered by Order No. 90365, which includes among other lands Sections 1 and 2, T8N-R6W, Grady County, Oklahoma.

2. That the Commission has jurisdiction over the subject matter herein; that notice has been given in all respects as required by law and by the rules of the Commission.

3. That the actual or prospective common sources of supply, named below, are expected to be encountered at the depths shown and same should be classified with drilling and spacing units and well locations established as follows:

<u>Common Source of Supply</u>	<u>Classification and Depth</u>	<u>Unit Size (acres)</u>	<u>Well Location</u>
Toronto	Gas, 6800 ft.	640	Not closer than 1320 feet to unit boundary
Tonkawa	Gas, 6970 ft.	"	" "
Missourian	Gas, 7200 ft.	"	" "
Layton	Gas, 7900 ft.	"	" "
Gibson	Gas, 10,000 ft.	"	" "
Osborne	Gas, 10,580 ft.	"	" "
Atoka	Gas, 10,950 ft.	"	" "
Hunton	Gas, 11,625 ft.	"	" "
Viola Lime	Gas, 12,275 ft.	"	" "
Bromide	Gas, 12,875 ft.	"	" "
Hart	Gas, 10,100 ft.	"	" "

5/6/2009

All documents with the exception of well logs are now in Adobe PDF format.

[Oklahoma Corporation Commission main website](#)

Back to the Imaging Documents web page.

Clicking on Oil and Gas Production will allow you to search Monthly Production Reports submitted by Payors and Operators to the OCC.

These files are very large and most contain large amounts of data.

But can be useful if you wanting to see neighboring wells that the operator may have in an area and how they are producing.

In this example we will search on High Sierra and look for wells in Pontotoc County.

G2 Partners, LLC is a strategic advisor to the energy industry.

Our principals have more than 25 years of experience solving complex problems for many of the world's largest energy companies. We have completed hundred of millions of dollars in transactions and saved our clients millions through risk management and strategic advisory engagements.

Our core areas of expertise include asset integrity management, project and transaction support, environmental and water resources, and strategic consulting for domestic and international projects.

Asset Integrity Management

Recent high-profile accidents involving oil and gas and pipeline assets have escalated the demand for rigorous risk management programs that comply with ever-changing regulatory requirements.

This Week's Top Headlines

Energy Independence Is No Longer Just a Pipe Dream

[click here](#)

Williamsport, Pa., used to be celebrated for its past – as the 1938 birthplace of Little League Baseball, which still plays its annual World Series nearby. Then natural gas was found.

Now this once-sleepy chunk of north-central Pennsylvania is a star on the map of an emerging national energy rush. Six hotels are new or being built, and about 100 companies have moved to town, sometimes so fast that the head of the local Chamber of Commerce has told executives wanting guided tours to wait.

New York City to Get First Major Natural Gas Line in 40 Years

[click here](#)

The bright lights of New York City may burn a little cleaner next year, when the first major natural gas pipeline in a generation is built to connect the largest U.S. metropolis to new energy-producing regions across the country.

Spectra Energy's controversial \$1.2 billion pipeline, which received approval from the Federal Energy Regulatory Commission (FERC) on Monday, has met with stiff opposition from local communities, but is seen as a key to reduce New York's reliance on dirtier oil-based fuels.

Water, Energy 'Inexorably Interlinked'
